UNIT 1 · LESSONS 5–8 · EXIT TICKET

# Bits Have Limits

Name: _____

1. A computer stores whole numbers in 3 bits. What happens when it computes 7 + 1? What is that error called?

2. How many bits does each student ID need so 100 students can each have a different one? Explain.

3. An image is 10 × 10 pixels with 24 bits per pixel. How many **bytes** is it? Show your work.
